**Professional Summary:**

---

Results-driven and highly motivated cloud enthusiast dedicated to developing purpose-built solutions using cloud technologies. Adept at crafting secure, scalable, and cost-efficient cloud solutions with a keen interest in learning emerging cloud trends.

Seeking an opportunity to use collaborative problem-solving and effective communication to contribute value to cloud projects and further develop expertise in automation and cloud architectures and operations.

**Cloud Experience:**

---

**Cloud-hosted Resume Website**[Live Website](#)

- Created a custom domain name with DNS configurations to ensure seamless and secure domain resolution. Defined CloudFront cache behaviors and origin access to enhance security and optimize content distribution. Integrated SSL/TLS certificate for secure data transmission and communication within the network infrastructure to strengthen data integrity.
- Implemented robust security measures for Amazon S3 to fortify confidentiality by crafting bucket policies to enforce fine-grained access control, allocating IAM roles and policies between applications and services.
- Defined DynamoDB tables and primary keys in accordance with best practices to streamline query performance while maintaining access control security.
- Developed serverless Lambda functions using Python and JavaScript to address diverse application requirements, connecting other services to create event-driven architectures with scalable workflows. Defined unit tests to confirm function integrations using API Gateway to handle browser requests to backend services.
- Crafted Terraform scripts to define, provision, and manage infrastructure resources in AWS, applying IaC principles to automate infrastructure and ensure consistency and repeatability.
- Utilized end-to-end CI/CD pipelines using GitHub Actions to automate code builds, testing, and deployment, drafting workflows to incorporate artifacts and trigger based on Git pushes/pull requests and IaC tools.

## Certifications:

---

- CLF-C01 (AWS Certified Cloud Practitioner)
- SAA-C03 (AWS Solutions Architect Associate)
- CCSK (CSA Certificate of Cloud Security Knowledge)
- DVA-C02 (AWS Developer Associate)
- Hashicorp Certified Terraform Associate (003)

## Skills:
